TESTED HYGIENE QUALITY

All Miele Professional ProfiLine dishwashers of the technical approval type GG11 pass the hygiene requirements of the type test based on EN 17735 in the "Short" and "Energy save/ECO" programs.

The tests LI-022-067-1 and LI-022-067-4 were carried out on the ProfiLine dishwasher PFD 103 SCi XXL. The following devices belong to the approval type GG11:
PFD 100, PFD 101, PFD 102, PFD 103 and PFD 104

The decontamination level provided in the test reports LI-022-067-1 and LI-022-067-4 are the criteria for awarding the quality seal "TESTED HYGIENE QUALITY" which are fulfilled.

Erbach, 26.01.2023

Prof. Dr. Benjamin Eilts

A copy of the report will be kept in the contractor's archives along with the raw data.
The test results refer exclusively to the test object mentioned. The general statutes and the contract for the award criteria of the quality seal "CERTIFIED HYGIENE QUALITY" apply.
