TESTED HYGIENE QUALITY

All Miele Professional MasterLine dishwashers of the technical approval type GG12 pass the hygiene requirements of the type test based on EN 17735 in the "Super Short" and "Energy save" programs.

The tests LI-022-068-1 and LI-022-068-4 were carried out on the MasterLine dishwasher PFD 407 DOS. The following devices belong to the approval type GG12: PFD 400, PFD 401, PFD 402, PFD 404, PFD 405, PFD 407 and PFD 408

The decontamination level provided in the test reports LI-022-068-1 and LI-022-068-4 are the criteria for awarding the quality seal "TESTED HYGIENE QUALITY" which are fulfilled.

Erbach, 26.01.2023

Prof. Dr. Benjamin Eilts

A copy of the report will be kept in the contractor's archives along with the raw data.
The test results refer exclusively to the test object mentioned. The general statutes and the contract for the award criteria of the quality seal "CERTIFIED HYGIENE QUALITY" apply.
