Control lock indicator (see 'Locking the control panel')

if lit:
Control panel is locked

Locking the control panel

- To lock, press and hold the select ✓ button until the control lock indicator 🔒 comes on.
- To unlock, press and hold the cancel ✕ button until the indicator 🔒 flashes and then goes out.

Close door indicator

if lit:
Door is open when oven is on (some functions only). See 'Troubleshooting' in your User guide.

Timer indicator
(see 'Using the timer')

if lit:
Timer is counting down

Display

Cooking time indicator
(see 'Automatic cooking' in User guide)

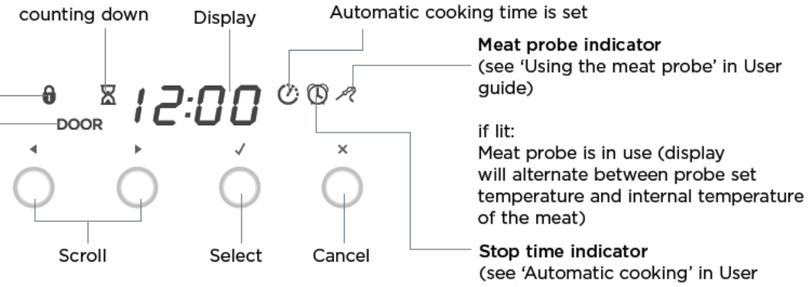

if lit:
Automatic cooking time is set

Meat probe indicator
(see 'Using the meat probe' in User guide)

if lit:
Meat probe is in use (display will alternate between probe set temperature and internal temperature of the meat)

Stop time indicator
(see 'Automatic cooking' in User guide)

if lit:
Automatic stop time is set

SETTING THE CLOCK

You set the clock within the user preference menu. To learn more about the user preference menu, refer to your User guide.
Note: If you do not wish to set the time initially when the oven is first switched on at the wall, press the cancel ✕ button to exit the clock setting. If you want to set the clock later, follow the steps under 'To change the time'.

When the oven is first switched on at the wall

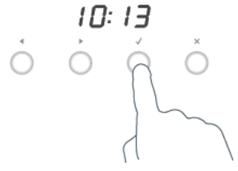

① The display will flash 24 Hr.

②Ⓐ Press the right scroll ▸ button to scroll between 24 Hr and 12 Hr
②Ⓑ Press the select ✓ button to confirm.

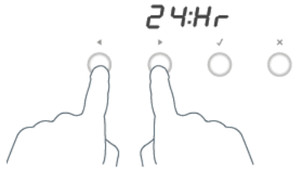

③ Press the left and right scroll ◂ ▸ buttons to set the time.

④ Press the select ✓ button to confirm.

To change the time
(within the user preference menu)

① Press and hold the left and right scroll ◂ ▸ buttons together for 3 seconds to enter the user preference menu.
- The display will either show 12 Hr or 24 Hr

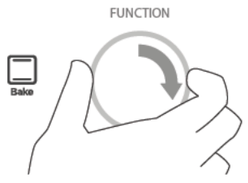

② Press the select ✓ button to confirm. The display will flash.
③ Follow steps 2-5 left to set the time.

- At step 2a, you also now have the ability to scroll between 24 Hr, 12 Hr and OFF (turns the display off).
- Refer to the User guide to learn more about this feature.

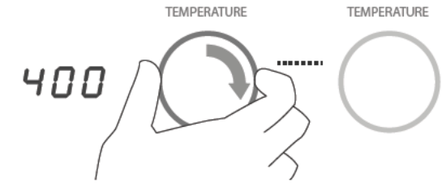

CONDITION THE OVEN

It is important to condition your oven before using it for cooking and baking. Conditioning will burn off any manufacturing residues and ensure that you get the best results right from the start.

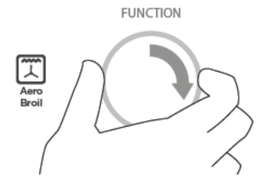

① Make sure you have removed any packaging and any cable ties used to secure the shelving during transit.
② Make sure you have set the clock.
③ Make sure all the shelves are fitted.

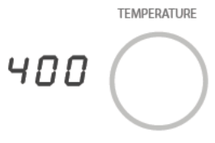

④ Select the **Bake** function.
- The halo will glow white.
- Each function has a preset temperature and so the oven will start heating at the **Bake** preset temperature of 360°F.

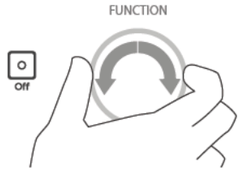

⑤ Set the temperature to 400°F for 30 minutes.
- While the oven is heating up, the temperature halo will glow red and the temperature indicator will alternately show the actual and set temperatures.
- When the oven has reached set temperature, a tone will sound and the halo will turn white.

⑥ After 30 minutes is up, select the **Aero Broil** function.

⑦ Set the temperature to 400°F for 5 minutes.
- The halo will remain white.

⑧ When you have finished, turn the function dial to **OFF**. The halos will go out.

- There will be a distinctive smell and a small amount of smoke during the conditioning of the oven. This is normal, but make sure the kitchen is well ventilated during the conditioning.
- Once cooled, wipe out the oven with a damp cloth and mild detergent, and dry thoroughly.

REPOSITIONING THE SHELVES

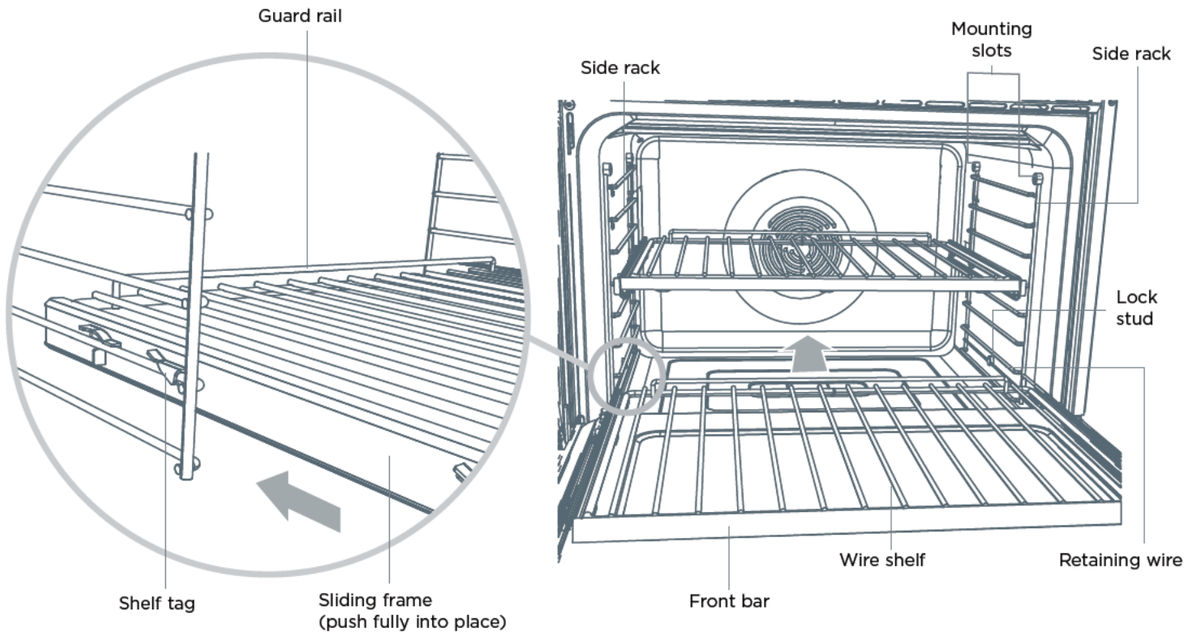

Placing the telescopic sliding shelves on the side racks provides EIGHT cooking positions to choose from. Refer to the User guide for suggested shelf positions.

Note: generally, the shelf positions in the top of the oven are suitable for broiling.
Those in the middle or lower region of the oven are suitable for baking, roasting and casseroles.

Shelf positions

- Always position oven shelves BEFORE heating the oven.
- To remove a sliding shelf, grip it by its two front corners (making sure you are gripping the wire shelf and the sliding frame together), tilt upwards and pull it out of the oven.
- To place a sliding shelf in the oven correctly, position it so that the front bar is toward you, as shown.
- Check that the sliding frame is not extended.
- Check the guard rail (as shown) to make sure the shelf is the right way up.
- Position the shelf so that it is level and the rear shelf tags on both sides of the sliding frame rest on the side racks (as shown).
- Then push the sliding shelf all the way to the back of the oven, until the front shelf tags drop into place.
- For your safety, the wire shelves and telescopic sliding frames are built together as one unit and are not separable. This means that when placed properly on the side racks, the slides will prevent the wire shelves from tilting when pulled towards you.
- To prevent the tags from lifting off the side racks, take care to slide the shelves forward horizontally.

USING THE TIMER

- You can use the timer at any time, even if you are not using the oven.
- If the time is more than an hour, the display will count down in minutes (hr:min). If it is less than an hour, it will count down in seconds (min:sec).
- You can set the timer for up to 23 hours 59 minutes.

IMPORTANT!
The timer does NOT turn the oven off.

① Select the timer ⧖ by pressing the right scroll ▸ button once.
- The timer ⧖ indicator will appear and the colon will flash.

② Press the select ✓ button to confirm.
- The display will flash to indicate the timer is ready to be set.

③ Set the time by pressing the scroll ◂ ▸ buttons.
- Holding the buttons down will speed up the scrolling.

④ Press the select ✓ button to confirm.
- The timer will then begin to count down.
- If you want to check the time of day, press the cancel × button once.
- Press the right scroll ▸ button to scroll back to the timer.

To modify the timer setting
① Make sure the display shows the remaining time counting down.
② Press the select ✓ button.
③ Press the scroll ◂ ▸ buttons to set a new time.
④ Press the select ✓ button to confirm.

To cancel the timer setting
① Make sure the display shows the remaining time counting down.
② Press the cancel × button until the display shows the time of day and the timer ⧖ indicator disappears.

When the set time is up
- The display will show 0:00 and a tone will sound every 15 seconds.
- Press any button to stop the tone sounding. The display will revert to showing the time of day.
