

# LAB11

36.25" x 28.5" x 28" (H x W x D)

-86°C capable ultra low chest freezer for laboratory and life science storage

**Highlights:**

- Ultra low -86°C for the storage of biological samples, chemicals, select vaccines and antibiotics, industrial research, and other materials with strict temperature requirements
- Extra thick 4 1/2" insulation for efficient and stable cooling
- Digital thermostat with external controls allows easy and precise temperature monitoring

**Product Features:**

|                                           |                                                                                                                                                                                                              |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ultra Low Temperature -86°C Chest Freezer | Designed for highly specialized cold storage applications of biological samples, DNA/RNA material, chemicals, select vaccines and antibiotics, and other substances with strict low temperature requirements |
| Advanced design                           | Interior walls feature more than 8 layers of D-shaped cooling pipes to ensure increased contact with the freezer walls in order to ensure maximum insulation and product efficiency                          |
| Manufactured by Elcold for Accucold       | Designed and constructed in Denmark                                                                                                                                                                          |
| Inner lids                                | Includes two removable inner lids for added protection from ambient air when opening the outer lid                                                                                                           |
| Extra thick insulation                    | 4 1/2" thick walls for added efficiency and stable cooling                                                                                                                                                   |
| Factory installed lock                    | Exterior lock on the handle for reliable security (2 keys included)                                                                                                                                          |
| Digital thermostat                        | Electronic microprocessor controls for precise temperature management, with temperature readout and controls externally located for added convenience                                                        |
| °C/°F Readout                             | Temperature display can be alternated between Celsius or Fahrenheit to best suit your preference                                                                                                             |
| High/low temperature alarm                | Audible alarm warns if the interior temperature goes out of the set range                                                                                                                                    |
