

# SINC4B241B

2" x 23.25" x 20.5" (H x W x D)

ENERGY STAR certified 7200W 208-240V 24" wide 4-zone built-in induction cooktop with a jet black glass surface, touch controls, and power boost

### Highlights:

ENERGY STAR certified for guaranteed savings and a greener performance

Advanced safety features include automatic shutoff, overflow protection, child lock, and residual heat indicator light

7200W of cooking power with boost functions for all elements

### Product Features:

|                         |                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ENERGY STAR certified   | Rated by the DOE to perform with more efficiency than federal standards require, saving your unit energy and you on higher utility costs                                                  |
| 24" Induction Cooktop   | Four cooking elements featuring magnetic heating for precise and efficient cooking                                                                                                        |
| Induction heating       | Electromagnetic heating technology where heat is generated inside your cookware, ensuring a more efficient process with less energy waste, faster heating, and a safer cooking experience |
| 7200W operation         | Powerful elements with fast heating to meet most stovetop cooking needs                                                                                                                   |
| Jet black glass surface | Elegant style on a smooth, jet black glass surface for a contemporary look that is easier to clean                                                                                        |
| 2 large elements        | 8 1/4" elements in the front left and rear right operate at 2000W (with a 3000W capacity at the boost setting) for fast, powerful heating                                                 |
| 2 standard elements     | 6 1/4" front right and rear left elements operate at 1500W (or 2000W using boost) to cover most general cooking needs                                                                     |
| Smart burner layout     | Largest elements are located diagonally, with maximum spacing to allow large cooking vessels in use simultaneously                                                                        |

**Boost function** All cooking zones include a "boost" function that lets them operate at a higher setting for up to 5 minutes, ideal for reducing cooking time when boiling water
