## Installation Diagram

### NOTES:

1. Allow at least 22" (55.9cm) clearance in front of oven for door depth when it is open.
2. Dimension G (cutout depth) is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet verify dimension G to assure it is the required depth.
3. For a cutout height greater than the maximum (H), add one 2" (5 cm) wide wood shim of appropriate height to each side of the opening under the appliance side rails. A trim kit may be purchased through a dealer, service, or on the brand website.
