Installation Diagram

⚠ WARNING Do not remove spacers (if equipped) on the side walls and/or on the back of the built-in oven. These spacers center the oven in the space provided. The oven must be centered to prevent excess heat buildup that may result in heat damage or fire.

NOTES:

1. Allow at least 27¼" (69.2 cm) clearance in front of oven for door depth when it is open.
2. Dimension **G** (cutout depth) is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet, or if noise is heard on convection models, verify dimension **G** to assure it is the required depth.
3. For a cutout height greater than **28 1/8" (71,4 cm)** add one 2" (5 cm) wide wood shim of appropriate height to each side of the opening under the appliance side rails. For a cutout height **(H)** greater than **28 5/8" (72,7 cm)** you can order a larger bottom trim, contact a Service Center
